

I.D.E.M.

11/14/08

*This is our written progress report to the Compliance Evaluation Section that we are to send you within 3 months of the effective date of the new NPDES permit, which was September 1, 2008*

*This is in referance to our 6 month schedule of compliance for our e-coli requirements.*

*We are going to be using the Coliscan MF method. Along with the Coliscan, we have purchased a incubator, petri dishes, sterile membrane filters, and assorted lab equipment to perform this testing.*

*In the last week or two of October, we ran a few e-coli test using this method and our new equipment to familiarize ourselves with the procedures and will be ready to meet our effluent limitations for e-coli starting April 1st of next year. If you have any questions, give me a call. Thank you.*

Greg Myers  
Wastewater Supt.
